

To Whom It May Concern,

Good afternoon. I am enthusiastically endorsing the Rays/Hines Historic Gas Plant Project, a collaborative initiative that promises to revitalize Tampa Bay through the combined efforts of the developers, the City of St. Petersburg, and Pinellas County.

This project is not only pivotal in retaining the Rays within our community but also stands as a beacon of economic prosperity. By fostering job creation, expanding housing availability, and enhancing our commercial real estate offerings, it holds the potential to transform our region significantly.

We are keenly anticipating the resolution of any outstanding issues, ensuring a unified path forward for this groundbreaking project.

Yours sincerely,

MK Michalak
